# Reproductive Loss and its Consequences for Mental Health

February 14, 2024 1:15 - 2:30 PM (EST) Conference Room D

Concepts of Truth, Inc., NGO, and the Mission of Uganda cordially invite you to join us as we examine the economic and social impact of the global mental health crisis and discuss the role of reproductive loss (miscarriage, stillbirth, and abortion) as potential root causes of mental health disorders, particularly depression, substance misuse, anxiety, and suicide. Panelists will also address disenfranchised grief and other mental health harms flowing from society's failure to acknowledge the grief women, girls, and their families experience following reproductive loss and the implications this has for social development and social justice.
